wearday

Android test guide for Mansi

What to test in this build, why each feature matters, and exactly how to test it, step by step with screenshots.

Build	Android test build (APK, “preview”), version 1.0.0
What’s new	My style (learning from past outfits) · Mood-based suggestions · Separate wardrobes per account on a shared phone
Time needed	About 45–60 minutes for everything
You’ll need	An Android phone with internet · an email address you can open on the phone (to receive sign-in codes) · a second email address you can open (only for Test 8)

Install the app

1. Scan the QR code with your Android camera, or open the link on your phone: expo.dev/accounts/jarvis446/projects/wearday/builds/8399c4fc-ddfb-41a3-aa19-cf1f5f5490d5
2. Tap **Install** and download the `.apk` file, then open it.
3. If Android asks, allow your browser to **“Install unknown apps”**, then tap Install again.
4. If you had an older Wearday test build, it updates in place and your data is kept.

How to use this guide

Do the tests in order: later tests use the clothes and outfits you add in earlier ones. For each test you'll find:

- **Why**: what the feature is for, so you can judge whether it feels right, not just whether it works.
- **Steps**: exactly what to tap. Screenshots show what you should see. They come from a test copy of the app, so dates, photos and small details will differ on your phone.
- **Expected**: what should happen. Anything different is worth reporting, even small things (wrong text, slow screens, odd layout).

Tick ☐ Pass or ☐ Fail at the end of each test, then fill in the summary table on the last page.

TESTS

1. Sign in with your email
2. Add clothes to your closet
3. Your account & sync
4. **New:** Add past outfits
5. **New:** What Wearday has learned
6. **New:** Suggestions for your mood
7. **New:** Wear the suggestion today
8. **New:** Two accounts on one phone
9. **New:** Signing out with unsynced changes
10. General checks

Good to know before you start

- **AI suggestions:** the free plan includes **1 AI suggestion per day**. After that the app offers "Get a basic suggestion", which also uses your mood and style. Premium can't be bought in this build yet.
- **Sign-in codes** come from "Wearday" by email, usually within a minute. Check spam the first time. If you request many codes quickly they may be delayed (limit of about 30 an hour).
- **Your style description** (Test 5) stays on this phone. Your clothes, outfits, ratings and moods sync to your account.

TEST 1

Sign in with your email

> **Why:** Wearday now asks you to sign in before using it, so your wardrobe is saved to your own account and can sync between phones. Signing in uses a one-time code instead of a password.

STEPS

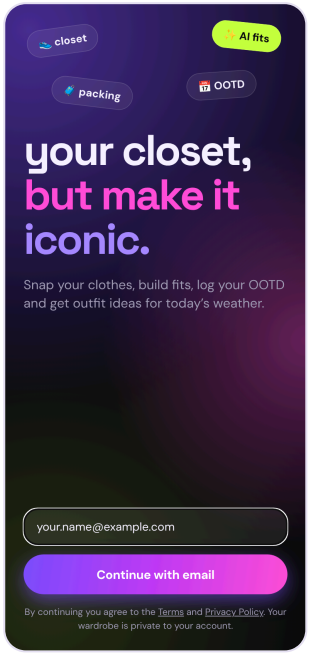

1. Open Wearday. You'll see the welcome screen.
2. Type **your email address** and tap **Continue with email**.
3. Open the email from Wearday and copy the 6-digit code.
4. Back in the app, enter the code and tap **Sign in**.

> **Expected:** the code arrives within about a minute. After signing in you see an empty closet with "Your closet is empty". A wrong code shows a clear error message.

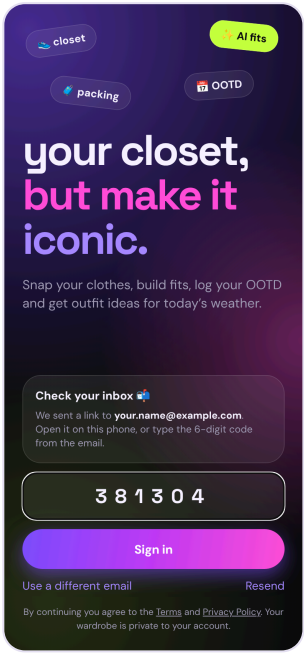

ALSO TRY

- Tap **Resend** and use the newest code.
- Close and reopen the app: you should stay signed in.

Result: ☐ Pass ☐ Fail

Enter your email

Enter the 6-digit code

TEST 2

Add clothes to your closet

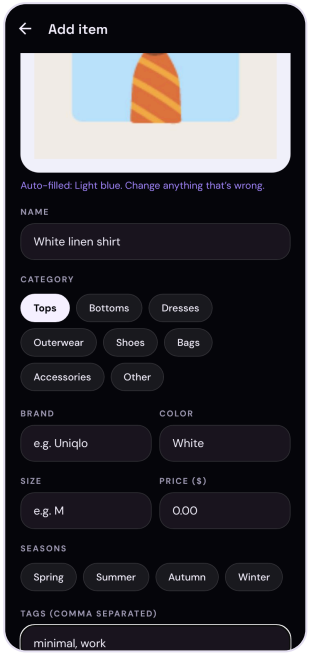

> **Why:** Everything in Wearday (outfit ideas, your style, packing lists) is built from the clothes in your closet. Adding an item should be quick, and the app tries to fill in the colour and type for you.

STEPS

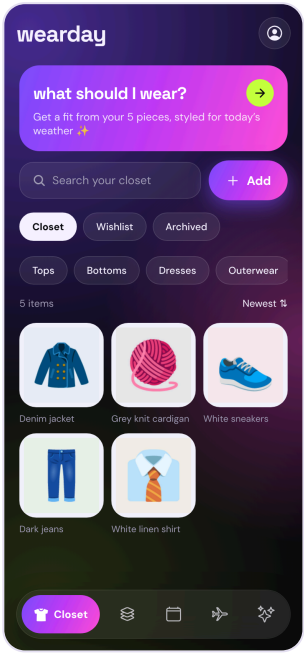

1. Tap **+ Add** on the Closet screen.
2. Tap the photo box and take a photo or choose one from your gallery. Photos on a plain background work best.
3. Optional: try ✂️ **Remove background**.
4. Check the name, category and colour (the app may fill these in), add tags like *casual, work, cozy*, and tap **Add to wardrobe**.
5. Repeat until you have **at least 6 items**: 2 tops, 2 bottoms (or a dress), 1 pair of shoes and 1 jacket or cardigan.

Expected: each item appears in the closet with its photo. Tapping an item opens its details, where you can edit or delete it.

Result: ☐ Pass ☐ Fail

Add item: name, category, colour, tags

Your closet with items

TEST 3

Your account & sync

> **Why:** Your wardrobe is backed up to your account automatically, so you don’t lose it if you change or lose your phone.

STEPS

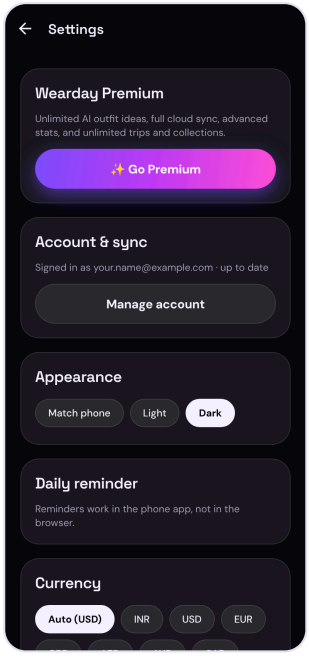

1. Tap the **profile icon** (top right of the Closet screen) to open Settings.
2. Under **Account & sync**, tap **Manage account**.
3. Check the Sync status, then tap **Sync now**.

Expected: your email is shown, and the status says *“Synced just now”* (or a few minutes ago). No error messages.

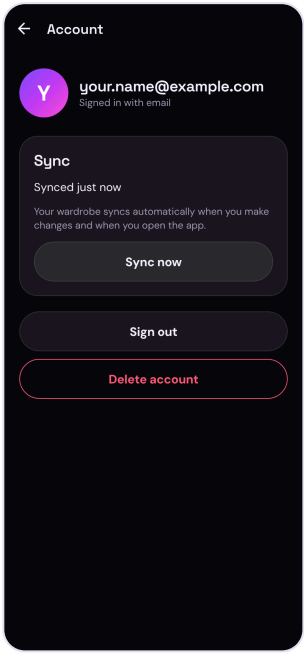

OPTIONAL (IF YOU HAVE A SECOND PHONE)

Install the app there and sign in with the same email. All your clothes should appear within a few seconds.

Result: ☐ Pass ☐ Fail

Settings → Manage account

Account: sync status, Sign out

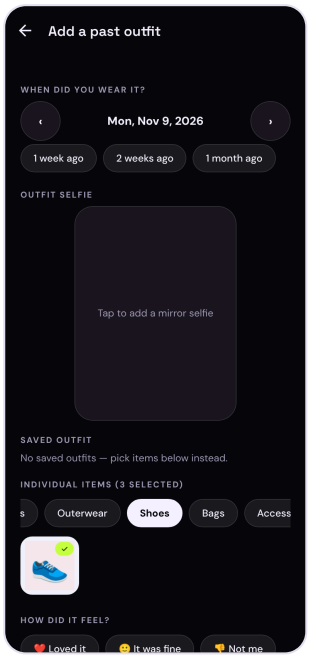

TEST 4 · NEW

Add past outfits (My style)

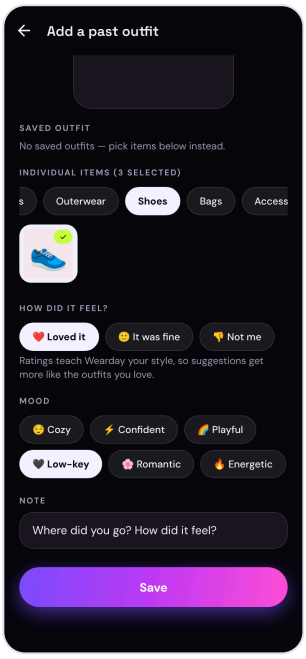

> **Why:** Wearday learns your personal style from outfits you've actually worn and how they felt. The more outfits you add and rate, the more suggestions look like something *you* would choose. You can add outfits from earlier days, not just today.

STEPS

1. On the Closet screen, tap **what should I wear?** to open **Style me**.
2. Tap the 🎨 **Your style** card at the top. This opens **My style**.
3. Tap **+ Add a past outfit**.
4. Under **When did you wear it?** use ‹ › or the 1 week / 2 weeks / 1 month shortcuts.
5. Pick the clothes: choose a category (Tops, Bottoms…), then tap items to tick them.
6. Under **How did it feel?** choose ❤️ **Loved it**, 🙂 **It was fine** or 👎 **Not me**.
7. Pick a **Mood** (e.g. 🖤 Low-key) and tap **Save**.
8. Add **at least 3** past outfits: one ❤️, one 👎, each with a different mood.

Pick the day and the clothes

Rate it and choose the mood

> **Expected:** each saved outfit appears under **Your outfits** on My style, with its date, clothes, mood and rating. Picking a day you already logged adds to that day instead of creating a duplicate.

Result: ☐ Pass ☐ Fail

TEST 5 · NEW

What Wearday has learned

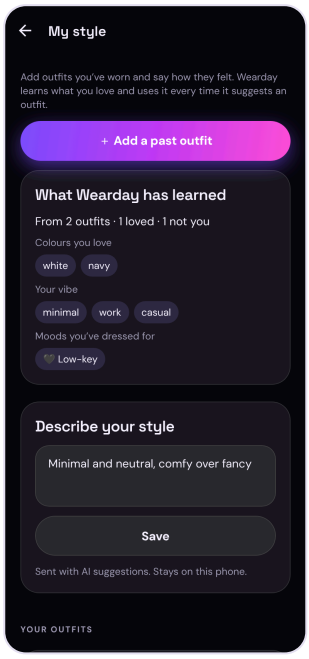

> **Why:** This shows, in plain words, what the app now knows about your style. It's sent to the AI with every suggestion request, so you can see why suggestions look the way they do. You can also describe your style in your own words.

STEPS

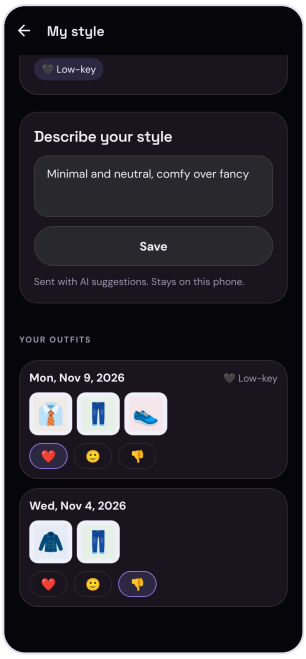

1. On **My style**, look at **What Wearday has learned**: colours you love, your vibe (tags), and moods you've dressed for.
2. In **Describe your style**, type something like *"Minimal and neutral, comfy over fancy, no yellow"* and tap **Save**.
3. Scroll to **Your outfits** and change a rating by tapping ❤️ / 🙂 / 👎 on one outfit.
4. Tap an outfit to open and edit it, or delete it.

Expected: the learned colours and tags match the clothes in your ❤️ outfits, not the 👎 ones. Changing a rating updates "What Wearday has learned" straight away. Your description is still there after closing and reopening the app.

Result: ☐ Pass ☐ Fail

What Wearday has learned

Your outfits, rated and with moods

TEST 6 · NEW

Suggestions for your mood

> **Why:** How you feel changes what you want to wear. Picking a mood (Cozy, Confident, Playful, Low-key, Romantic, Energetic) steers the suggestion, and it's combined with your learned style, the occasion and today's weather.

STEPS

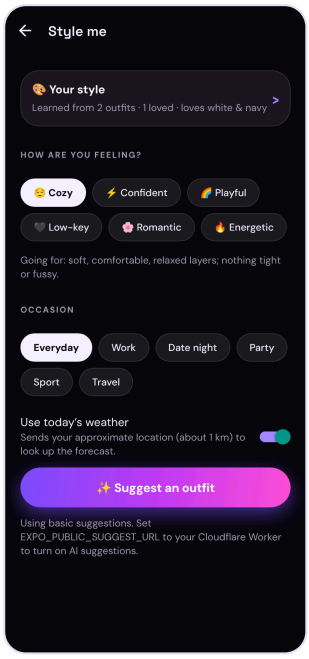

1. Open **Style me** (tap **what should I wear?**).
2. Under **How are you feeling?** tap a mood, e.g. 😌 **Cozy**. A line below explains what that mood means for clothes. Tap it again to unselect.
3. Choose an **Occasion**, leave **Use today's weather** on (allow location if asked), and tap ✨ **Suggest an outfit**.
4. Read the outfit name and the reason underneath.
5. After your free AI suggestion for the day, use **Get a basic suggestion** and try a different mood.

Expected: an outfit from your own closet that fits the mood (Cozy should usually add a knit or layer, Playful should prefer bright pieces). It should lean toward clothes from your ❤️ outfits and avoid your 👎 combinations. The reason often mentions the mood or your style. A suggestion takes a few seconds.

Report it if: the outfit uses something you rated 👎 together again, ignores the mood completely, or shows an error.

The screenshots were taken on a test copy without AI, so they show a line "Using basic suggestions…". Your build uses the AI, so you won't see that line, and your outfit names and reasons will be different.

Result: ☐ Pass ☐ Fail

Pick your mood

Your suggestion and why

TEST 7 · NEW

Wear the suggestion today

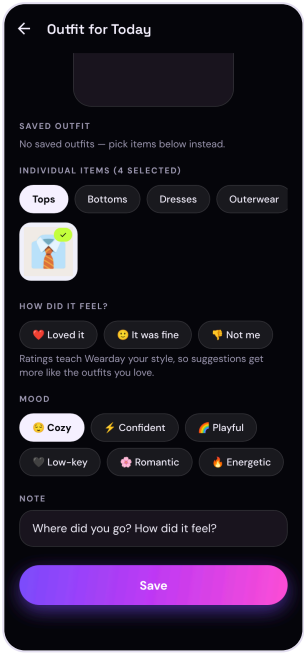

> **Why:** When you wear a suggestion, logging it (with how it felt) teaches Wearday even more about your style. The mood you picked is carried over automatically.

STEPS

1. On a suggestion, tap **Wear today**.
2. Check that the clothes are already ticked and the **Mood** you chose is already selected.
3. Choose a rating under **How did it feel?** and tap **Save**.
4. Go to **My style** and find today's outfit in the list.
5. Also try **Save outfit** on a suggestion. It should open the outfit builder.

Expected: today's outfit appears in **Your outfits** as "Today", with the mood and rating, and in the calendar tab.

Result: ☐ Pass ☐ Fail

Wear today: mood already chosen

TEST 8 · NEW

Two accounts on one phone

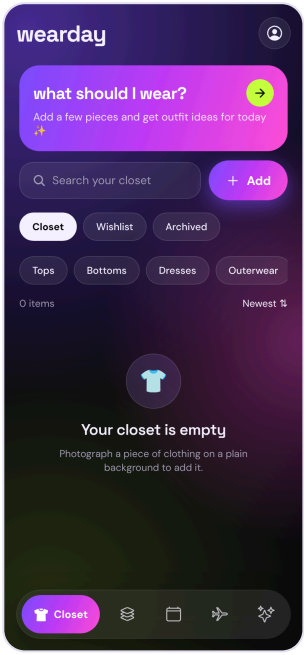

> **Why:** If someone else signs in on your phone, they must **not** see your clothes, and your clothes must **never** be copied into their account. Before this fix, a second person's account could receive the first person's wardrobe.

STEPS

1. Profile icon → **Manage account** → **Sign out**. Read the message and confirm:
   "You'll need to sign in again to use Wearday. Your wardrobe stays on this phone until a different account signs in here."
2. Sign in with your **second email address**.
3. Check the closet, then add one item (e.g. a hat).
4. Sign out again, then sign back in with **your main email**.

Expected: the second account starts with an **empty** closet. After signing back in with your main email, all your clothes and past outfits come back, and the hat from the second account is **not** there.

Result: ☐ Pass ☐ Fail

Second account: empty closet

TEST 9 · NEW

Signing out with unsynced changes

> **Why:** If you sign out while offline, changes not yet saved to your account could be lost if a different person signs in next. The app now syncs one last time before signing out and warns you if something hasn't been saved.

STEPS

1. Signed in with your main email, turn on **Airplane mode**.
2. Add a new item to your closet (any photo).
3. Profile icon → Manage account → **Sign out** → confirm.
4. You should see this warning:
   "Some changes haven't synced. 1 change on this phone isn't in your account yet. They're kept if you sign back in here, but lost if a different account signs in on this phone. Sign out anyway?"
5. Tap **Cancel**. Turn off Airplane mode, wait a few seconds, tap **Sync now**, then sign out. This time there should be no warning.

Expected: the warning appears only while there are unsaved changes. After syncing, signing out works normally, and the new item is there when you sign back in.

Result: ☐ Pass ☐ Fail

TEST 10

General checks

> **Why:** A quick look around the rest of the app to make sure nothing else broke.

- Open every tab at the bottom (Closet, Outfits, Calendar, Trips, Stats) and check that each one loads.
- Build an outfit in the **Outfits** tab, and create a trip in **Trips**.
- Settings → **Appearance**: switch between Dark and Light. Check that the text is readable everywhere, especially on My style and Style me.
- Close the app completely (swipe it away) and reopen it: you should still be signed in with everything there.
- Rotate the phone, and try with large font size in Android settings, if you have time.

Result: ☐ Pass ☐ Fail

Reporting a problem

For each problem, please send:

1. **Test number and step** (e.g. “Test 6, step 3”).
2. **What you did** and **what you expected**.
3. **What happened instead**, plus any error message word for word.
4. A **screenshot or screen recording** (Power + Volume down for a screenshot).
5. Your **phone model** and **Android version** (Settings → About phone).
6. Whether it happens **every time** or only sometimes.

Ideas and “this feels confusing” notes are just as useful as bugs, especially for My style and the mood picker.

RESULTS SUMMARY

#	Test	Pass	Fail	Notes
1	Sign in with your email			
2	Add clothes to your closet			
3	Your account & sync			
4	Add past outfits			
5	What Wearday has learned			
6	Suggestions for your mood			
7	Wear the suggestion today			
8	Two accounts on one phone			
9	Signing out with unsynced changes			
10	General checks
